

LBS FIELD TRIPS 2019

Altcar 17th May

Lunt Meadows 6th July

Everton 7th September

Freshfield 19th October

Altcar 17th May

On the day six new species were added to the Altcar list . Crosswort *Cruciata laevipes* (near the River Alt) when on with the entomologists in the day and Knotted Clover *Trifolium striatum*, Variegated Dead-nettle *Lamium maculatum* , Pink Sorrel *Oxalis articulata*, Rat-tailed Fescue *Vulpia myuros* and then unfortunately New Zealand Pigymweed *Crassula helmsii* at Wally's Pond. Also I found out while putting together this talk a seventh new species Curly Pondweed (or African Elodea) *Lagarosiphon major* (introduction – South African) at I Range. So Altcar list is now 437 species.

Exploring Altcar

Battery cottage
area

*Green-winged Orchids,
there are 23552*

Lunt Meadows
